**Jesse Liberty**

MICROSOFT & XAMARIN MVP

@jesseliberty   <http://jesseliberty.me>

# Summary

- Out variables: cleaner use of out parameters
- Tuples: multiple values in a single entity
- Deconstruction: break tuples into constituent parts as variables
- Patterns: match against the shape of the object

# Summary

- Local functions: functions within functions
- Enhanced literals
- Return by reference
- Throw exceptions as expressions
